Abstracts

Infrared Spa Capsules can be used for great hydrotherapy, aromatherapy and other treatment sessions at professional aesthetic clinics, spas and beauty salons.

Infrared spa capsules use radiant energy to directly penetrate the body's tissues to a depth of over 3 cm's. Its energy output is tuned to correspond so closely to the body's own radiant energy that our bodies absorb close to 93% of the infrared waves that reach our skin. Infrared rays are selectively absorbed by the tissues needing a boost in their output. The internal production of infrared energy that normally occurs within our tissues is associated with a variety of healing responses, and may require a boost to a maximal level to insure the fullest healing response possible in a tissue under repair.
