## Abstracts

Inherent flame retardant fiber is one that is used for fabrics that do not require the addition of flame-retardant chemicals after the yarns have been spun or the fabric has been woven or knitted. The yarns for these fabrics use only fibers that are naturally flame resistant; or a blend of fibers that can include a combination of FR fibers or both FR fibers and non-FR fibers. The common theme is no flame retardant chemicals are added to the yarn or fabric.
