Abstracts

Insulated food containers and hydration bottle cannot just keep your food hot, they can also keep your food wonderfully cold; really, they keep your food the exact temperature you want it to be. That's how insulation works; it maintains the temperature of whatever it's insulating. One of the features of an insulated container is that it is typically very durable. The best insulated food containers and hydration bottles are made out of stainless steel and not plastic, which means they will be fine even after years. It's one of the big things that makes an insulated container worth it.
