Abstracts

A toilet seat is a hinged unit consisting of a seat, and usually a lid, which is bolted onto a toilet bowl for a toilet used in a sitting position. When the lid is down, the lid itself is also used as a seat when needed. Smart Toilet Seat may include many features, including a heated seat, a bidet, and a blow drier. High-tech seats are most common in Japan, and electrically heated toilet seats have been popular in Japan since the 1970s. Smart toilets include features such as: automatic-flushing mechanisms that flush a toilet or urinal when finished; water jets, or 'bottom washers' like a bidet; blow dryers; artificial flush sounds to mask noises; and urine and stool analysis for medical monitoring.
