Abstracts

An intrauterine contraceptive device is a medical device, which is inserted in the uterus to prevent conception. A plastic string is attached to the end of the device to ensure correct placement and its removal. These devices are available in various forms, such as coil, loop, triangle, and T-shaped, and are made up of plastic or metal. An intrauterine contraceptive device may also be used as an emergency contraception method after unprotected sex. An intrauterine contraceptive device is inserted into the uterus with the help of health care professionals.
