## Abstracts

A jewelry appraisal magnifying loupe is a single-barrel hand-held loupe commonly used by jewelers to magnify gems and other jewelry they wish to examine. The tool is easy to fold, the 10x magnifying loupe is suitable for inspecting jewelry and signs, and it is the Gemological Institute of America's standard for grading diamond clarity. Gems are sometimes examined at magnifications higher than 10x, but this may result in too little depth of field in the area of focus. Therefore, the accepted standard for diamond grading is that 10x visible inclusions and imperfections can affect the clarity grade.
