Abstracts

Laminate flooring (also called floating wood tile in the United States) is a multi-layer synthetic flooring product fused together with a lamination process.

Laminate flooring has grown significantly in popularity, perhaps because it may be easier to install and maintain than more traditional surfaces such as hardwood flooring. It may also have the advantages of costing less and requiring less skill to install than alternative flooring materials. It is reasonably durable, hygienic (several brands contain an antimicrobial resin), and relatively easy to maintain.

This report contains market size and forecasts of Laminate Wood Flooring in global, including the following market information:

Global Laminate Wood Flooring Market Revenue, 2017-2022, 2023-2028, (\$ millions)
