Abstracts

Large industrial fans are HVLS fans that typically measure 6 feet and up. These fans are meant to circulate a large amount of air by using air streams. Air is pulled from above the fan and pushed down in a conical shape to the floor below. These highly efficient, cost-saving commercial ceiling fans are being used in warehouses, distribution centers, gymnasiums and a variety of other applications. Rotating at an optimized low speed, HVLS industrial fans move the most air over the largest area at the lowest cost.
