Abstracts

Laser thickness gauge is designed for measuring metals and any other material, such as plastics, wood, gypsum, rubber and more, that are processed in coil, sheet, or strip form. It provides fast and reliable non-contact laser thickness measurements and improves product quality and optimizes the production process. In-line system analyzes thickness of materials in production and automatically controls thickness and evenness with scanned data. Off-line system is used to measure the thickness of samples at the laboratory.
