Abstracts

Foley catheter is a flexible tube-like device that is inserted into the bladder to drain urine. Latex Foley catheters are latex-coated catheters that maximize the patient safety, reduce friction, and minimize the irritation and infections caused due to indwelling catheters. These catheters are used after urological surgeries, such as benign prostatic hypertrophy, prostate cancer, and narrowing of the urethra, which aid patients to urinate easily.

The factors that drive the latex Foley catheters market include increase in prevalence of urinary bladder diseases, high demand for minimal invasive surgeries, large pool of geriatric population suffering from urinary disorders, technological advancements such as introduction of novel coatings and engineering strategies, and advantages such as easy accessibility and affordability. However, prone to hypersensitivity; availability of substitutes, namely, urethral plugs, vaginal slings, fixer-occluder devices, and other, and adverse reactions are expected to impede the market growth. The introduction of new beneficial products to reduce infections, such as silicone-coated latex Foley catheters that are resistant to chemical attacks and temperature changes, is expected to provide major opportunities for the market growth in the near future.

This report contains market size and forecasts of Latex Foley Catheters in global, including the following market information:
