Abstracts

Life-support pressure vessels include pressure vessels used to store medical oxygen gas and those used in a self-contained breathing apparatus (SCBA) set. Medical oxygen pressure vessels are not only used in hospitals but also in other applications, such as home care, aviation, and emergency services. Similarly, SCBA pressure vessels are also used in a wide number of applications, such as industrial sites, escape sets, military, firefighters, and first responders. Considering the global market scenario, steel/aluminum-made pressure vessels rule the medical oxygen market, whereas composite pressure vessels hold the leading position for SCBA application.
