Abstracts

Lithium sulfide is the inorganic compound with the formula Li_2S . It crystallizes in the antifluorite motif, described as the salt $(\text{Li}^+)_2\text{S}^{2-}$. It forms a solid yellow-white deliquescent powder. In air, it easily hydrolyses to release hydrogen sulfide (rotten egg odor).

Lithium sulfide (Li_2S) is a product specially designed for the use in high performance batteries which can be either applied as electrode material or as precursor for solid electrolytes. At present, many applications of lithium sulfide in lithium batteries are still in the stage of R & D and testing.
