Abstracts

Carpets are constructed in either a loop or a cut pile, or sometimes a combination of both. Within the loop or cut carpet types you will also find a range of types such as plush, twist, textured or plain, and combinations of the same. The variations in type contribute to the different appearances and performances of the carpets. When choosing a carpet it is important to take into account not just the type of pile, but the best fibre and colour to meet your needs.
