Abstracts

Low pressure die casting is competitive casting method when the production quantity is relatively small and/or when heat treatment is needed to improve the mechanical properties. The tolerances and the surface finish are the same as achieved by gravity die casting. Low-pressure Die Casting Machines have two types that are Semi-automatic machine and fully automatic machine, Semi-automatic operated machine by moving the dies manually and filling of the die by modern, fully automatic low pressure die casting technology. Fully automatic machine automatic work through computer controlled pressure and time curve.
