Abstracts

The managed M2M service market enables connectivity, compute and decision services that are necessary for connected solutions. Managed M2M services are a solution element within the broader solution sets of IoT, digital business and operational technology (OT) systems in industrial environments. Managed M2M services enable businesses to collect, analyze and interact with data streams, thus providing businesses with the ability to monitor, manage and control (manually and through automation) assets associated with business processes. Managed M2M services may encompass integrated and managed IT infrastructure and systems, OT infrastructure and systems, software, network services (connectivity), and IT services. This market focuses primarily on connectivity and a continuum of related value-added services, such as consulting, M2M device engineering, M2M application development and integration, related middleware aggregation, application hosting, and related system management.
