Managed server is a type of internet hosting service. It also provides data storage services. Further, it has maintenance and backup systems. Managed servers offer high performance, better security, email stability, and control, and due to these factors, these are high-priced hosting service. Managed server is mainly used by websites that receive a large volume of traffic. Managed servers create secure and dedicated network connectivity. This enables a faster, more predictable performance, besides saving of cost. Managed server utilizes a flexible processor/core, memory, and onboard storage options. When enterprises need to deliver better compute and IO performance and requires higher capacity, managed servers are used.
