## Abstracts

Wooden window sills are eco-friendly, well-insulated, and have a natural appearance that looks great on most homes. The right type of wood can also be low maintenance — as long as it is properly waterproofed.

Window sills made of chipboard or MDF are made by pressing and gluing sawdust left over from the woodworking industry. On top of the decor, a plastic film or wood veneer is applied to the pressed and glued material. Such panels have a large number of colors and can imitate the surfaces of natural materials.
