## Abstracts

Tubing anchor is a downhole device for downhole string anchoring in production and measurement Wells. It can improve the stress state of the string, reduce the fatigue damage of the string, control the string expansion, reduce the leakage and extend the service life of the string. Fixing the string in the rod pumping process can reduce stroke loss and improve pump efficiency. Fixing the string in fracturing, acidification and other processes can improve the bearing capacity of downhole tools and string.
