## Abstracts

Industrial Personal Computer (IPC) is a reinforced and enhanced personal computer. IPC is a general term for a tool that uses a bus structure to detect and control the production process, electromechanical equipment, and process equipment. The industrial computer has important computer attributes and features, such as a computer CPU, hard disk, memory, peripherals and interfaces, as well as an operating system, control network and protocols, computing power, and a friendly human-machine interface. IPCs often run in harsh environments and require higher data security. Therefore, IPCs are usually designed for reinforcement, dustproof, moisture-proof, corrosion-proof, and radiation-proof. A medical IPC can be easily configured into a communication hub for care delivery team collaboration or a multi-media patient engagement tool.
