Abstracts

A shower chair or shower bench is a seat used in a bath or shower. These seats are designed for people who can not stand and have to sit in the shower. By using a shower chair, older people and people with limited mobility can gain some independence by taking a bath or with help. For most older people, showering becomes more and more difficult as their physical age begins to decline and their energy level declines, but it's almost daily in the hot summer months, therefore, it is necessary to solve the problem of the elderly bathing difficulty. This is especially true for people with mobility problems.
