Medical ultrasound refers to a technology that uses high frequency sound wave to produce diagnostic images. Medical ultrasound is also known as sonography. Medical ultrasound is a non-invasive and safe procedure for examination of body parts such as the heart, organ and blood vessel in the abdomen and joints. Medical ultrasound uses non ionizing radiation and has greater sensitivity compare to other clinical examination. Medical ultrasound images are taken with the help of ultrasound gel. Ultrasound gels are conductive medium used by technicians and physicians before diagnosis of patient for clear diagnostics images.
