## Abstracts

Medication therapy management, generally called medicine use review in the United kingdom, is a service provided typically by pharmacists that aims to improve outcomes by helping people to better understand their health conditions and the medications used to manage them. This includes providing education on the disease state and medications used to treat the disease state, ensuring that medicines are taken correctly, reducing waste due to unused medicines, looking for any side effects, and providing education on how to manage any side effects. The process that can be broken down into five steps: medication therapy review, personal medication record, medication-related action plan, intervention and or referral, and documentation and follow-up.
