Abstracts

Metal dust caps are a necessary accessory for fiber optic connectors, fiber optic adapters, and unused optical modules. It plays a very important role in the storage and transportation of fiber optic connectors, fiber optic adapters and optical modules, and protects these optical components from mechanical damage. When the optical equipment is not in use, the metal dust cap also has a dustproof function to a certain extent, but this does not mean that the metal dust cap can completely prevent the pollution of the optical equipment.
