## Abstracts

The term “microfiber” is somewhat broad, but in the underwear context it typically indicates that the garment is soft and highly breathable. The yarns and threads used to weave these types of fabrics tend to be designed for performance, and often allow for good airflow. This means that people wearing them stay cool even in warm climates, or while exercising or engaging in other strenuous activity. Microfibre underwear consists of synthetic yarn made from polyester, nylon, rayon and other fibers.
