Abstracts

Mobile insurance refers to a type of insurance cover which is available to protect your mobile, iPhone or PDA in the event it is lost, stolen or accidentally damaged, either in the domestic area or overseas. Mobile insurance cover can be taken out on a monthly or annual basis paid by direct debit or in some cases by credit card, some insurers offer an automatic renewal service when the policy expires.

Insurance is a big part of the mobile ecosystem. Most major wireless carriers, insurance specialists, device OEMs, retailers and even banks now offer insurance plans that cover theft, loss, malfunctions and damage of mobile phones. Many policies now also integrate enhanced technical support and additional protection features such as data backup facilities, allowing users to securely backup their phone data online.

Given the increasing prevalence of expensive household goods, cars and consumer electronics, insurance has become an unavoidable and often necessary cost in modern life. Mobile phones, and smartphones in particular are no exception to this trend.
