Mobile tanks share many of the same features of storage tanks. They are containers that hold liquids, compressed gases or mediums used for the short- or long-term storage of heat or cold. Also, they must be designed to deal with a heavy sloshing load and the risk of collision or other accident. Some of these include ocean-going oil tankers and LNG carriers; railroad tank cars; and the road and highway traveling tankers. Also included are the holding tanks which are the tanks that store toilet waste on RVs, boats and aircraft.
