Abstracts

Mobile Vertical Shaft Impact Crusher is a free movement of vertical shaft impact crusher. The vertical shaft impactor (VSI) consists of a feed funnel, a feed pipe, a rotor, and a fixed anvil or rock shelf. Essentially, the feed material drops through the feed tube into the rotor, which, through centrifugal force, throws the material against the fixed anvil made of composite metal alloys or rock shelves. When rock strikes an anvil or rock shelf, it breaks along natural stress lines, forming a uniform cube product.
