## Abstracts

The most important part of car interior transformation is the seat. Under normal circumstances, the car leather seat fabric is made of leather and leather, yellow leather and water composite leather three, with better yellow cowhide. Generally, it can be divided into several layers of leather. The outer skin is better, and the first layer in front of the texture has tensile strength and air permeability; the second is two layers of leather, which has poor elasticity and is easy to peel off paint. Use scalp. At present, the popular pinhole leather on the market is generally safe and flexible, with good air permeability, convenient maintenance and longer service life.
