Abstracts

The MPO Fiber Optic Connector industry can be broken down into several segments, Single-mode, Multimode, etc.

Across the world, the major players cover T&S Communications, US Conec, Senko, Siemon, Amphenol, Sumitomo Electric, Suzhou Agix, Nissin Kasei, Molex, Panduit, etc.

MPO Fiber Optic Connectors (Multi-fiber push on connectors, or MPOs for short), are fiber connectors comprised of multiple optical fibers. While defined as an array connector having more than 2 fibers, MPO Connectors are typically available with 8, 12 or 24 fibers for common data center and LAN applications. Other fiber counts are available such as 32, 48, 60 or even 72 fibers, but these are typically used for specialty super high-density multi-fiber arrays in large scale optical switches.

You may also see the term MTP Connector used interchangeably with MPO Connector. The term MTP is a registered trademark of the MPO connector offered by US Conec. The MTP connector is fully compliant with MPO standards and is described by US Conec as an MPO that has been engineered to very tight tolerances for improved performance. For the purposes of this discussion, we will refer to only MPO connectors since MTPs are considered to be MPO connectors.
