Abstracts

Mushroom packaging is also included in it. Mushroom packaging is usually made by cultivating fungi on the medium of husk, hulls and woody biomass of different agriculture waste including rice, soy, and cotton. Waste material acts as the substrate on which fungal mycelium is added. The packaging material which arises from mycelia and waste is strong, light in weight, biodegradable, and durable for a long time. This packaging is used in organic fertilizers. Mushroom packaging needs a sterile environment to prevent fungal infection.
