Abstracts

The implementation of strict environmental regulations, global water shortages, and the increasing popularity of Zero Liquid Discharge (ZLD) systems are key factors driving the vacuum evaporator market. Due to the increase in energy costs, the rapid decline of freshwater resources and the increasing sensitivity, more sustainable technologies are needed. Therefore, the field of MVR (mechanical vapor recompression) vacuum evaporators is expected to grow at the highest rate. (TVR) is newer and is rapidly replacing TVR in Europe and North America.
