Abstracts

The NB-IoT smart gas meter is an upgraded product after adding a smart module to the membrane gas meter. The technical barriers are higher than that of the membrane gas meter, so the gross profit margin is higher than that of the membrane gas meter. Compared with GPRS communication technology, NB-IoT has the characteristics of wide coverage, high gain, large connection, and low power consumption. It is widely used in utilities, smart cities, mobile payment and other scenarios. In recent years, the application of NB-IoT gas meters has improved the gross profit margin of smart gas meter manufacturers.
