Abstracts

Peripherally inserted central catheters (PICC) are commonly known as percutaneous indwelling central catheters or PICC line. PICC lines are often used in antibiotic therapy, chemotherapy, or total parenteral nutrition or for administration of drugs that should not be given peripherally. PICC line is inserted in the body percutaneously at peripheral site and extended up to superior vena cava. It is an alternative to central venous catheter, which is inserted through major veins such as jugular or femoral. Generally, PICC line is appropriate for patients who have undergone more than two weeks of treatment. These catheters are well-sustained by neonates, with dwell time of two to three weeks. However, dwell time varies case to case. There could be risk of complications such as phlebitis, bleeding, catheter occlusion due to holding of PICC for more than a month. Strict infection control procedures should be followed before insertion of PICC line to reduce the risk of infection.

This report contains market size and forecasts of Neonatal Peripherally Inserted Central Venous Catheter (PICCs) in global, including the following market information:

Global Neonatal Peripherally Inserted Central Venous Catheter (PICCs) Market Revenue, 2017-2022, 2023-2028, (\$ millions)

Global Neonatal Peripherally Inserted Central Venous Catheter (PICCs) Market Sales, 2017-2022, 2023-2028, (K Units)

Global top five Neonatal Peripherally Inserted Central Venous Catheter (PICCs) companies in 2021 (%)

The global Neonatal Peripherally Inserted Central Venous Catheter (PICCs) market was valued at million in 2021 and is projected to reach US\$ million by 2028, at a CAGR of % during the forecast period.

The U.S. Market is Estimated at \$ Million in 2021, While China is Forecast to Reach \$ Million by 2028.

Powered Segment to Reach \$ Million by 2028, with a % CAGR in next six years.

The global key manufacturers of Neonatal Peripherally Inserted Central Venous Catheter (PICCs) include Argon Medical, CR Bard, Inc., Teleflex Incorporated, Medical Components, Vygon SA, Cook Medical Inc, AngioDynamics, Cardinal Health and Health Line International Corp. etc. In 2021, the global top five players have a share approximately % in terms of revenue.

MARKET MONITOR GLOBAL, INC (MMG) has surveyed the Neonatal Peripherally Inserted Central Venous Catheter (PICCs) manufacturers, suppliers, distributors and industry experts on this industry, involving the sales, revenue, demand, price change, product type, recent development and plan, industry trends, drivers, challenges, obstacles, and potential risks.
