Carbon enhanced lead acid battery is a kind of lead-acid battery, which is made by adding carbon materials to the negative electrode of lead-acid batteries. Carbon is a very magical element with the most abundant types of compounds. Its addition greatly improves the charge and discharge performance while retaining the original power density of lead-acid batteries. At the same time, carbon lead-acid battery has high safety and reliability, which can make up for the deficiencies of ordinary carbon lead acid battery that cannot cope with various complex working conditions.
