Abstracts

A non-stick surface is a surface engineered to reduce the ability of other materials to stick to it. Non-stick cookware is a common application, where the non-stick coating allows food to brown without sticking to the pan. Non-stick is often used to refer to surfaces coated with polytetrafluoroethylene (PTFE), a well-known brand of which is 'Teflon.' The same properties that make Teflon™ coatings the gold standard in the kitchen for nonstick cookware have also helped create significant advancements in everyday goods like windshield wipers and windbreakers, aerospace technologies, electronics, architectural materials, medical tools.
