Abstracts

Non-woven adhesive is adhesive to bonding non-woven fabrics. Adhesives for non-woven hygiene products are primarily used in the manufacture of baby diapers and feminine hygiene pads and shields, as well as adult incontinence products. To ensure maximum protection, high adhesion abilities, resistance, and, in some cases, elasticity under stress are key features of adhesives used in these applications. Further, adhesives for hygiene products need to avoid skin irritations and other adverse effects when they come in contact with the human skin.
