Abstracts

Nylon cord fabric is a tire skeleton fabric woven with strong strands as warp and medium and fine single yarns as weft. The warp threads are closely arranged, and the weft threads are sparsely arranged, like a curtain. Nylon has two types: nylon 6 and nylon 66. Nylon 66 dipped cord fabric is usually used as the skeleton of rubber products such as tires, so that it can withstand huge pressure, impact load and strong vibration. Cord is an important material that affects tire performance and life.
