Abstracts

Odour control systems are installed based on the effluent type and the odour intensity. The plants may even require multi-layer or multiple odour control systems. In the municipal sector, there is a trend of resource recovery wherein wastewater treatment units use, recover, or sell organic solids, nutrients, minerals, or energy. The facilities are sometimes called water resource recovery facilities as opposed to wastewater treatment plants. Potential areas for water recovery resource facilities are anaerobic digestion and nutrient recovery with a combination of heat and power.
