Abstracts

Office paper includes electrostatic copy paper, digital coated paper and digital color laser paper. Electrostatic copy paper uses wood pulp as the main raw material and, since it goes through destaticizing, doesn't stick in the printer or copy machine because of static electricity. That's why it is most frequently used in everyday work. Digital coated paper is mainly used on digital printers to print high-quality color books such as magazines, art albums and posters. Digital color laser paper is especially designed and manufactured for color copy machines and color laser printers. Featuring even, flat and smooth surface, bright color and clear-cut lines and strokes, it is suitable for printing high-quality documents, renderings and bidding documents.
