Abstracts

In 2010, the Office of the National Coordinator for Health Information Technology (ONC) selected six organizations to test and certify electronic health records (EHR) software, which are also known as electronic medical records (EMR) software. Dubbed ONC-Authorized Testing and Certification Bodies, or ONC-ATCBs, these six companies determine which EHRs meet criteria to support 'meaningful use' (established by the Secretary of Health and Human Services).

An ONC-ATCB certified software assures users that the EHR software system comprises the technological capabilities, functionalities and security requirements that meet the criteria of meaningful use. The certification also ensures the provision of a compatible and structured format for patient data that can be retrieved from and transferred to other EHR systems.
