## Abstracts

Padded dividers are used in boxes and bags to protect the packed product. Padded dividers protect the packaged products, owing to which they have become an integral part of the protective packaging market. These dividers are used in corrugated boxes or cartons for dividing the box into several sections. The division within the box enables the stacking of multiple products such as bottles, cans etc. Padded dividers provide the even dispersal of weight to ensure that the packaged product is safe from damage during transportation.

This report contains market size and forecasts of Padded Divider in global, including the following market information:

Global Padded Divider Market Revenue, 2017-2022, 2023-2028, (\$ millions)
