## Abstracts

Pallet Rack Wire Decking is alternative to the traditional wood decking for pallet racking, they have additional benefits such as safety regulations, fire safety protection and hygiene. Pallet mesh decking is a simple, quick, and easy option. Made from steel, wire welded first, added support bars, they come in either galvanised or powder-coated format for rust-free, long-life durability.

Mesh decking for pallet racking and shelving is used as another layer, preventing stock from falling past your racking system and causing injury or damage to your stock. The design of the mesh decks prevents the build-up of dust on your products, it also allows your sprinkler system to work efficiently through them in the event of a fire.
