Abstracts

Probiotics are an important factor for pets' gastrointestinal health and even body health. [1] in the natural environment, animals can supplement probiotics by consuming various raw foods. As the dog food, cat food and snacks consumed by domestic pets for a long time are processed food, the intake of various food additives will continue to destroy the balance of bacteria in the gastrointestinal tract of pets, which is prone to constipation, diarrhea, indigestion, gastroenteritis and other gastrointestinal diseases. Pet probiotic is used to provide probiotics to pets to keep them healthy.
