Abstracts

Nutritional supplements for pets are products that provide a source of recognized essential nutrients, like calcium or vitamin A. They are intended to work as supplements and ensure the nutritional completeness of the diet in pets. The supplements are being marketed not only as pills/powders but also as ingredients in pet foods/gravies/snacks. The other alternative delivery formats that are gaining shares, due to the preference for pet palatability, include gels and pastes, as well as gravies and powders, designed to be added to pet food.
