Abstracts

An examination table (or exam table) is used to support patients during medical examinations. During these exams, doctors in offices (UK: surgeries), clinics and hospitals use an adjusting mechanism to manipulate and position the table to allow patient support, closer examination of a portion or the entire patient, and the ability to move the patient on and off the table safely. Examination tables often have rolls of paper in which patients sit on, protecting the table. The paper is normally discarded after each patient uses the table.
