Abstracts

The plastic film capacitor market comprises about half of the market value for all industrial-grade capacitors. This market is further divided into AC plastic film capacitors for electrical systems and DC film capacitors for electronic systems.

The plastic film capacitor market is also determined by its dielectric. In this instance, polypropylene (PP) film is used for AC electrical capacitors and polyethylene terephthalate (PET) is used for 5 mm PCB-mounted smoothing capacitors. Plastic film capacitors are electrostatic designs and therefore have high voltage handling capabilities, but at low capacitance values.
