Abstracts

Pallets are used for storage and transportation, as well as for product displays in stores. Pallets are made of wood or plastic. Plastic trays are often used to transport fresh and frozen foods with strict hygiene requirements as well as medicines or other products. Plastic trays are not porous and are easy to clean, clean or disinfect. It can be reused for a long time without damage. They are ideal for storage and reuse in warehouses. They are smooth, light, and fragment-free, making them easy to handle by hand. The durability of plastic trays makes them ideal for use on pallet packaging machines. It can be used for weight between 1,500 and 3,000 pounds and is easy to repair and reuse.
