## Abstracts

Climbers are continually becoming more popular with time. The vast designs that come in a variety of shapes, styles, and structures make it easy to fit and blend in with any playground. They add a modern touch to most playgrounds and help children work upper-body strength. Horizontal ladders, ring climbers, and parallel bars work children's arms as they carry themselves across the structure. Boulders, rock climbers, and ropes are fun for children as they challenge their body and encourage exploration.
