Abstracts

Pneumonia is referred to as inflammatory, diseased condition of the lungs, which affects the alveoli of the lungs. Symptoms of pneumonia include chest pain, dry cough, trouble in breathing, and fever. Acquired pneumonia and health care-associated pneumonia are two types of pneumonia. Pneumonia affects over 450 million people across the globe and results in four million deaths every year. The global pneumonia therapeutics market is projected to expand at a significant pace during the forecast period, due to increase in the number of cases of pneumonia and advancement in treatments. Moreover, growing awareness about pneumonia treatment among patients, rising demand for treatment, increasing incidence of pneumonia, and improvement in diagnosis methods are promoting the growth of the global pneumonia therapeutics market.
