## Abstracts

At present, insect have been widely used in pollination of protected and open-air crops in the world. Insect pollination for greenhouse vegetables and fruit trees can not only greatly increase the yield, but also improve the quality of fruit and vegetable, reduce the ratio of deformed fruit and vegetable, and solve the hormone pollution caused by chemical pollination. Therefore, Bumblebee pollination has become an ideal insect for greenhouse vegetables pollination. Using Bumblebee pollination has also become an important measure for green food production recognized worldwide. This is the case.
